MMSlog®
SMART CABINET SYSTEM

MMSlog®
SMART CABINET SYSTEM

The MMSlog® Smart Cabinet System is the definitive solution for the online and objective management of stocks and the traceability of high cost medical products (prostheses, implants, catheters, etc.). With the use of RFID, automatic inventories are carried out with precision and speed, which are registered by the management software thus facilitating all logistical information of the product (stocks/consumption/ orders/etc.) and the system (access/breakdowns/alerts).

FUNCTIONALITY HIGHLIGHTS

| Decentralized management of high cost inputs | Passive management of product traceability | Online management of accessibility, consumption, status and inventory | Easy integration with centers' data systems and/or providers' software | Guaranteed return on investment |

PRODUCT HIGHLIGHTS

| UHF RFID hardware for long range reading | Read performance >400 tags | User identification: code, magnetic card or proximity card (RF) | Interior with sliding panels and guides for ISO3394/HTM71 modules | Plug & Play installation (electricity and data) and low maintenance cost |

OPERATING CYCLE

PROVIDERS
Alcon A Novartis Division
Medtronic Further, Together
Abbott A Promise for Life
Boston Scientific
B|BRAUN SHARING EXPERTISE
stryker

REPLACER
Transportation and placement at service unit

CENTRAL WAREHOUSE
Reception of products → Confirmation of reception → Labeling, registration and upload in systems

DEPARTMENT OF SUPPLIES
Communication with supplier for replacement and invoicing
Communication with HIS, Procurement Dept. warehouse and supplier

Notification of reception to supplier

SERVICE
User ID Registration
Staff with Procedure Requirements Sheet
Return of unused products
User validation
Access to goods
Inventory / stock reading

OPERATING ROOM
Surgery/ Procedure

Withdrawal of products

Upload in systems
Validation
(withdrawal-return)
Automatic generation of documentation validated by assistance staff
Expense sheet and implementation card
